

- Input voltage: 3V/CR2430 (DC90)
- Input voltage: 3V/CR2430
- Work temperature: -10°C ~ 50°C
- Emission distance: open 200m, two walls 30m

DC90

- Transmitter: You can choose single channel (DC90). Each indicator light means one control channel. Press 'channel choose' button P1- (indicator move left side) or P1+ (indicator move right side) to change the channel. On the analogy of this, loose finger when the indicator light move to suitable channel that you select effective channel. All indicator lights flash that means all channels is effective (group control state).
- Notice: transmitter Do not exposed to moisture and strike, so as not to affect life. When you use transmitter, if found emission distance obviously short or less sensitive, please change another same new battery. Please have batteries for recycling.

All controls support 433MHz
All controls support 3V/CR2430 Specific parameters to the nameplate shall prevail

DC90 Series Control System Specification

Matchable R Tubular Motor Set up

Delete all the datas of the motor and the new emitter has been programmed.

The interval of each button must within 10 seconds of resetting, otherwise the system will restore the original state.

Matchable DC227/DC228 Set up

The interval of different button must within 10 seconds for all setting, otherwise the system will restore the original state

One receiver store 20 emitters channels at most, and one channel of emitter can control 20 receivers at most.

Matchable DC90 Set up

The interval of different button must within 10 seconds for all setting, otherwise the system will restore the original state.

One receiver store 20 emitters channels at most, and one channel of emitter can control 20 receivers at most.

Version No: A/a4
